

Quake2Lithium.com is a fansite and community born out of a simple idea; *an international Quake 2 Lithium revival*.[□]

Without the hard work and support of others, this site would not be possible.

Special thanks to:

- [Jouni Rajala](#) for designing the theme and some graphical elements of this site.
- Flagship Industries for sponsoring [Ventrilo](#) access for this site.
- Matt "WhiteFang" Ayres for creating and releasing as open source, the Lithium Mod.
- All those playing for keeping Lithium alive all these years!
- The larger Quake II community for their various contributions.
